

H2 Style Harness

Fully adjustable nylon harness, allows the radio to be worn diagonally across the chest. Can be manufactured to fit most types of radio.

H1 Style Harness

Leather harness, with fully adjustable leather and elastic straps and belt attachment. This design allows the radio to be worn under the arm and can be manufactured to fit most types of radio.

H3 Harness

Fully adjustable nylon harness, allows the radio to be worn diagonally across the chest. Supplied **without** radio case but can take a firm radio case fitted with a suitable belt loop.

H1KF

Leather harness, with fully adjustable straps (as H1 above). Fitted with Klick Fast dock (see page 18) to allow the radio case to be rapidly removed and changed. The harness is extremely slim and comfortable with the case removed. (Shown with straps removed for clarity).
